

PRECISION ENGINEERED SILENCE.

THE AMTAC DIFFERENCE

AMTAC creates silencers that meet the needs of the most demanding shooters. Traditional suppressors add length and weight to your rifle and increase gas blowback. AMTAC's flagship, over-barrel design features a high-volume initial blast chamber attached to a short, single piece baffle structure. Unlike its longer, end-mount counterparts, AMTAC suppressors add only 3.7 inches of barrel length for improved maneuverability in tight spaces.

The innovative design brings the weight closer to the center of the rifle for reduced fatigue and faster target transition. With an over-barrel chamber that also acts as a guide to line up mounting threads, the suppressors spin into place as fast as most quick disconnects on the market. AMTAC suppressors are short, lightweight, fast and most importantly—quiet.

THE SINGLE PIECE BAFFLE

All AMTAC suppressors feature a single-piece baffle. AMTAC machines its entire baffle structure, including the mounting threads, out of a single piece of material in a single operation. This key differentiator results in suppressors with an extremely tight concentricity that deliver a consistent return to zero when removed and re-attached.

THE FIVE AMTAC SUPPRESSOR LINES:

CQB, CQBM, SBR and SNIPER are offered in both 5.56mm and 7.62mm models. The HORNET is offered in 9mm.

CQB

The original, full-size over-barrel suppressor designed to fit a 16" barrel with a carbine-length gas system. It adds only 3.7 inches to a rifle's overall length.

- ① Total length: 9.7"
- ➦ Additional length to Gun: 3.7"
- ⊖ Diameter: 1.62"
- ⊖ Weight: 20.5 oz
- ⊖ Suppression (5.56 / 7.62): 10 - 20DB / 17 - 22DB
- ⊖ Thread pitch (5.56 / 7.62): 1/2 x 28 / 5/8 x 24

CQBM

A shorter version of the flagship CQB suppressor designed to work with a mid-length gas system.

- ① Total length: 7.7"
- ➦ Additional length to Gun: 3.7"
- ⊖ Diameter: 1.62"
- ⊖ Weight: 17.7 oz
- ⊖ Suppression (5.56 / 7.62): 15 - 20DB / 17 - 22DB
- ⊖ Thread pitch (5.56 / 7.62): 1/2 x 28 / 5/8 x 24

SBR

The only direct-thread, end-mount suppressor AMTAC offers. The SBR features our single-piece baffle design and boasts pinpoint accuracy and excellent sound suppression.

- ① Total length: 7.7"
- ⊖ Diameter: 1.62"
- ⊖ Weight: 20.5 oz
- ⊖ Suppression (5.56 / 7.62): 20-30 DB
- ⊖ Thread pitch (5.56 / 7.62): 1/2 x 28 / 5/8 x 24

SNIPER

The Sniper offers the AMTAC over-barrel design modified specifically for heavy barrel rifles. It boasts a rock-solid return to zero and minimal shift in Point of Impact (POI).

- ① Total length: 9.7"
- ➦ Additional length to Gun: 3.7"
- ⊖ Diameter: 1.62"
- ⊖ Weight: 22.2 oz
- ⊖ Suppression (5.56 / 7.62): 15-20 DB / 17-22DB
- ⊖ Thread pitch (5.56 / 7.62): 1/2 x 28 / 5/8 x 24

HORNET

Designed specifically for Pistol Caliber Carbines, the Hornet features an over-barrel design to add minimal length while drastically reducing both sound and recoil.

- ① Total Length: 7.7"
- ⊖ Diameter: 1.62"
- ⊖ Weight: 16.6 oz
- ⊖ Suppression: Up to 30 DB
- ⊖ 1/2 x 36
